

List of fish species

The environmental organization Ambioterra is located in Saint-Chrysostome and worked since 2009 to improve the water quality of the English River and to protect its fauna.

Thus, we do fish inventories and help land owners towards better environmental practices to protect the river, free of charge.

Here is the list of fish species captured in the English River.

The English River...

full of life!

Fish species at risk

Our watershed and biodiversity protection project in the English River answers to an urgent need for the protection of many fish species at risk or intolerant to pollution. For example...

Sport fishing

Ambioterra has been able to record more than thirty fish species in the English River some of those being game fishes like the:

Channel Darter

Logperch

American Eel

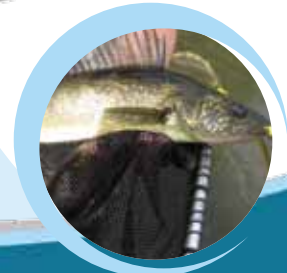

Stonecat

Rosyface Shiner

Cutlips Minnow

Walleye

Sauger

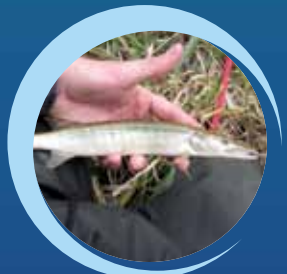

Smallmouth Bass

Brown Bullhead

Northern Pike

Muskellunge

Your input is important to complete our knowledge and data bank on fauna in the English River. If you encounter a species that is not listed in this leaflet, please contact us !
